

Western Washington University Team

Our capstone project is a collaborative effort led by WWU students Liam Dean, Chantel Nelson, Nathan Lochmiller, and Ellie Skiffington guided by the expertise of Aran Clauson and local experts Dr. Elisabetta, Dr. Reme, Katie Wierenga, and Dr. John Shaw. It is based on the formulary written by Dr. Elisabetta and her team. The Karen Medical Formulary is an essential tool developed to support improved healthcare in challenging environments.
